1           7. The massage device as claimed in claim 4,  
2       wherein the protrusion is an airbag.

1           8. The massage device as claimed in claim 1,  
2       wherein the bottom therapeutic member has a roller,  
3       having a protrusion facing the sole of a foot.

1           9. The massage device as claimed in claim 2,  
2       wherein the bottom therapeutic member has a roller,  
3       having a protrusion facing the sole of a foot.

1           10. The massage device of as claimed in claim 3,  
2       wherein the bottom therapeutic member has a roller,  
3       having a protrusion facing the sole of a foot.

1           11. The massage device as claimed in claim 4,  
2       wherein the bottom therapeutic member has a roller,  
3       having a protrusion facing the sole of a foot.

1           12. The massage device as claimed in claim 1,  
2       wherein the bottom therapeutic member has a seat, having  
3       a protrusion facing and protruding against the sole of a  
4       foot of the patient.

1           13. The massage device as claimed in claim 2,  
2       wherein the bottom therapeutic member has a seat, having  
3       a protrusion facing and protruding against the sole of a  
4       foot of the patient.

1           14. The massage device as claimed in claim 3,  
2       wherein the bottom therapeutic member has a seat, having  
3       a protrusion facing and protruding against the sole of a  
4       foot of the patient.

1       15. The massage device as claimed in claim 4,  
2       wherein the bottom therapeutic member has a seat, having  
3       a protrusion facing and protruding against the sole of a  
4       foot of the patient.

1       16. The massage device as claimed in claim 1,  
2       wherein the bottom therapeutic member has a protrusion,  
3       freely movable between a protruded position and a  
4       submerged position facing the sole of a foot.

1       17. The massage device as claimed in claim 2,  
2       wherein the bottom therapeutic member has a protrusion,  
3       freely movable between a protruded position and a  
4       submerged position facing the sole of a foot.

1       18. The massage device as claimed in claim 3,  
2       wherein the bottom therapeutic member has a protrusion,  
3       freely movable between a protruded position and a  
4       submerged position facing the sole of a foot.

1       19. The massage device as claimed in claim 4,  
2       wherein the bottom therapeutic member has a protrusion,  
3       freely movable between a protruded position and a  
4       submerged position facing the sole of a foot.
